

**IN THE CLAIMS:**

Please amend the claims as follows.

Claim 1 (Previously Presented): A display apparatus for use with an electronic equipment, having a display panel for displaying images, comprising:

a storage part contained in said electronic equipment for storing display data representing display images to be displayed on said display panel; and

a data writing part for receiving display data from the outside of said electronic equipment to write into said storage unit as said display data,

wherein said storage part is contained in a display panel portion of said electronic equipment, and writing of display data into said storage part is enabled when said display panel is detached from a device body portion of said electronic equipment.

Claim 2-3 (Canceled).

Claim 4 (Previously Presented): A display apparatus according to claim 1, wherein said storage part comprises a flash memory.

Claim 5 (Canceled).

Claim 6 (Original): A display apparatus according to claim 1, wherein said data writing part writes display data accumulated in a predetermined site into said storage part through a communication network.

Claim 7 (Original): A display apparatus according to claim 6, wherein said communication network is the Internet through which said display data accumulated in said site being downloaded into said storage part.

Claim 8 (Previously Presented): A display apparatus according to claim 1, wherein said data writing part writes arbitrary display data into said storage part.

Claim 9 (Previously Presented): A display apparatus according to claim 1, wherein said data writing part captures externally existing arbitrary display data and writes the same into a display part.

Claim 10 (Previously Presented): A display apparatus according to claim 8, wherein said arbitrary display data is an image taken by a user using an image shooting device.

Claim 11 (Currently Amended): A display apparatus according to claim 1, wherein:  
software for capturing said an arbitrary display data and writing the same into said storage part is stored in a predetermined site; and  
said data writing part downloads said software through the Internet.

Claim 12 (Original): A display apparatus according to claim 1, wherein said display data represents a moving image.

Claim 13 (Original): A display apparatus according to claim 1, wherein said display data represents a still image.

Claim 14 (Original): A display apparatus according to claim 1, wherein said electronic equipment is a vehicle-mounted electronic equipment.

Claims 15-17 (Canceled).

Claim 18 (Previously Presented): A display apparatus according to claim 9, wherein said arbitrary display data is an image taken by a user using an image shooting device.

Claim 19 (Previously Presented): A display apparatus according to claim 18, wherein:  
software for capturing said arbitrary display data and writing the same into said storage part is stored in a predetermined site; and  
said data writing part downloads said software through the Internet.
